tryve

FOR SCHOOLS AND UNIVERSITY COUNSELORS

Start every university meeting from what the student said matters.

Students aged 15 to 18 talk to Ora, an AI guide, and build a Thrive Profile in their own words. Each college gets a Fit Check in words, never a score. Your team sees what each student chooses to share.

FOR YOUR STUDENTS

A page they own

- Six sides of fit: learning, people, place, values, future, support.
- Three questions per college: could you get in, could your family afford it, would you thrive there.
- No percentages, no rankings.

FOR YOUR COUNSELORS

Built for the 20-minute meeting

- Session-ready views in the student's own words.
- "Why this college" in words for every college on a list.
- Flags where choices and stated preferences pull apart.

FOR SCHOOL LEADERS

Patterns across a year group

- Who has started, who needs a nudge, how lists change.
- Aggregated views, students' private answers stay private.

SAFE BY DESIGN

Made for minors' data

- Guardian consent before any under-18 profile is built.
- No advertising, no third-party tracking on student accounts.
- Built to the standards of GDPR, FERPA and COPPA.
